# LINBIN CONTAINERS, HOLDERS &

Linvar offers containers, holders and accessories in a wide range of sizes, configurations and capacities. All have a common feature: they can be easily put on and taken off our louvered panels, whether the panels are mounted on racks, cabinets, mobile trolleys, vans or assembly benches. They can be placed in any position on the panels, which permits very compact space-saving arrangements and the bottom containers are as easy to handle as the top ones.

Parts and materials of virtually all weights, shapes and sizes can be efficiently stored and transported in Linvar containers. There is exceptional flexibility in the design of storage facilities and materials handling systems and modifications are very simple to make when needs change.

On pages 12 through 15 are descriptions and specifications for the entire Linvar line of containers, holders and accessories. Dimensions, volumes, load capacities and LBU values are provided to help you determine your requirements.

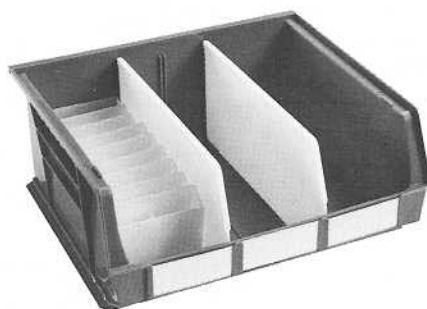

**LINBINS** Manufactured from a high quality polyethylene copolymer, LINBINS carry a lifetime guarantee under normal usage. They are available in nine different sizes, ranging from 4" long x 4" wide x 2" high through 18" long x 16" wide x 11½" high. Color choices are red, yellow, blue

and beige. Each has a large identification card holder, positive divider slots and a molded finger grip for ease of handling. Dividers, transparent covers, Mini-bins and ID cards are available. **We also offer LINBINS in black conductive material for electronics applications. Add "C" to part No. for conductive material.**

18	8¼"	9	990 cu"	60 lb.	150 lb.	5	<b>30-360*</b>

NOTE: Available in blue, yellow, red and beige.

**MINI-BINS** are available for use with 30-230 and 30-250 Linbins to further increase storage flexibility. These containers are 4½" high x 4" wide x 1¼" deep and can be fitted into Linbins as shown in the photograph. They increase the storage capacity for limited quantities of small parts. Mini-bins can also be divided in half, which per-

mits up to 54 different line items to be separately stored in a single 30-250 Linbin. Dividers are required for 30-250 Linbin.
